EDUCATION

University Malaysia Sarawak (UNIMAS)

Malaysia

Bachelor of Computer Science (Software Engineering) CGPA 3.8/4.0

Nov. 2020 – Nov. 2024

EXPERIENCE

Artiselite Sdn Bhd

Malaysia

Full Stack Developer Intern

Sept. 2024 – Nov. 2024

- Designed and customized Jasper Reports, improving data visualization and enhancing reporting clarity for end-users.
- Developed and maintained features within an existing Django-based web application, enhancing functionality and optimizing backend performance.
- Conducted thorough API testing with Postman, identifying and resolving integration issues to ensure smooth system interactions.
- Ensured seamless integration of new features with the existing PostgreSQL database, verifying data integrity and proper storage of newly generated reports.
- Contributed to the creation and refinement of Vue.js frontend elements, improving UI responsiveness and user experience.
- Utilized Git and GitHub for version control, ensuring seamless collaboration and maintaining code integrity in a team environment.

Alphalab Technology Sdn Bhd

Malaysia

Software Engineering Intern

Feb. 2023 – Aug. 2023

- Conducted comprehensive user training sessions, ensuring smooth adoption of the system and reducing the need for ongoing support.
- Executed website testing, identifying usability and functionality gaps to enhance the customer experience and improve user interaction.
- Facilitated collaboration between users and development teams, gathering feedback to refine system features and align improvements with user needs.
- Authored a detailed Software Requirement Specification (SRS) document, providing clear development guidelines and ensuring alignment with client expectations.
- Designed and led User Acceptance Testing (UAT), identifying critical issues pre-launch and ensuring a seamless transition to production.

PROJECT

GradXchange([Link:gradx.store](https://gradx.store)) | *Python, Django, Bootstrap, PostgreSQL, Google Cloud*

- Developed a full-stack marketplace web application with Django, enabling users to list, browse, and manage items and services.
- Implemented authentication and user management, including sign-up, login, password reset, and third-party integrations with Google and GitHub for seamless access.
- Designed and integrated search functionality with filters, allowing users to refine results by date, price, tags, and seller name.
- Built an admin dashboard, providing summary views and moderation tools for managing pending, approved, and rejected listings.
- Created item/service management capabilities, enabling users to mark items as sold, edit details, and track their listings.
- Implemented messaging functionality, allowing users to send and receive messages directly within the platform.

TECHNICAL SKILLS

Programming Languages: Python, SQL (PostgreSQL, MySQL), JavaScript, HTML/CSS,

Frameworks: Django, Bootstrap, Vue.js

Developer Tools: GitHub, Git, Google Cloud Platform, Postman, VSCode, UML Diagram, Figma

Testing: Manual Testing, Automatic Testing, API Testing
